1. Regarding MMSEA Section 111 reporting: Are your carriers doing full reporting or only the required reporting of actives 45 years of age and older or another form of reporting on the MMSEA? Please describe the population for whom your carriers exchange MMSEA eligibility data. [For your response, assume that our claims administrators are doing the required reporting.](#)
2. What specific Medicare information are your carriers receiving through the MMSEA? What Medicare data is provided to your Claims Administrator by the carriers? How often and in what form is that data being provided? [Our claims administrators are receiving Medicare entitlement information monthly.](#)
3. Retiree Health plan coverage - Can you provide the cost to the Commonwealth of Virginia to provide health plan coverage to your early retirees (pre-65)? [Pre-Medicare retirees pay the full cost of their retiree health plan coverage in the state program. However, they are pooled with active employee participants for premium determination and, therefore, receive the benefit of the larger risk pool.](#)
4. Does the Commonwealth of Virginia keep and manage all eligibility data? [The Department of Human Resource Management maintains all eligibility data for the state program. The Local Choice Plan eligibility is managed separately.](#)
5. Can you provide the plan code for TLC members. This will allow SSDC to verify any TLC members with electronic info. that is being passed to SSDC on the Beneficiary file. [Currently, there is no electronic file format for TLC members for the purpose of Medicare eligibility determination. If a file is created, it will differentiate state plan participants from TLC participants.](#)
6. Would the Commonwealth consider a contingency fee pricing structure? [We are interested in your proposed solutions to the requirements listed in the RFP.](#)
7. What is the Commonwealth's preferred method of pricing? [We are interested in your proposed solutions to the requirements listed in the RFP.](#)
